Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

The problem is Early Detection of Chronic Kidney Disease. Chronic kidney disease (CKD) means your kidneys are damaged and can't filter blood the way they should. The main risk factors for developing kidney disease are diabetes, high blood pressure, heart disease, and a family history of kidney failure. 10% of the population worldwide is affected by chronic kidney disease (CKD), and millions die each year because they do not have access to affordable treatment.

5 minutes

PROBLEM

How might we achieve early detection of chronic kidney disease?

Key rules of brainstorming

To run a smooth and productive session

Stay in topic.

Defer judgment.

Go for volume.

Encourage wild ideas.

Listen to others.

If possible, be visual.

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

JAYACHANDRAN

collection of liver related samples and blood samples

ordering the collected samples on data sheets

preparing the data sheets

splitting the dataset

MEIYANATHAN

include scikit learn and use ML algos

calculate accuracy and predict scores

Based on requirement, update dataset

calculating accuracy and predicting scores

Finally, deploy model

AJAY

By plotting inputs, visualize the data

Validate and evaluate model

Train the model

RAKESH

Based on test samples, graph the data

Analyze the result

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

Data collection and processing

collection of liver related samples and blood samples

preparing the data sheets

splitting the dataset

Visualizing the data by plotting inputs

Datasets and model

Based on requirement, update dataset

include scikit learn and use ML algos

models like KNN, etc

Training the model

Analyzing and Deployment

calculating accuracy and predicting scores

Analyze the result

Based on test samples, graph the data

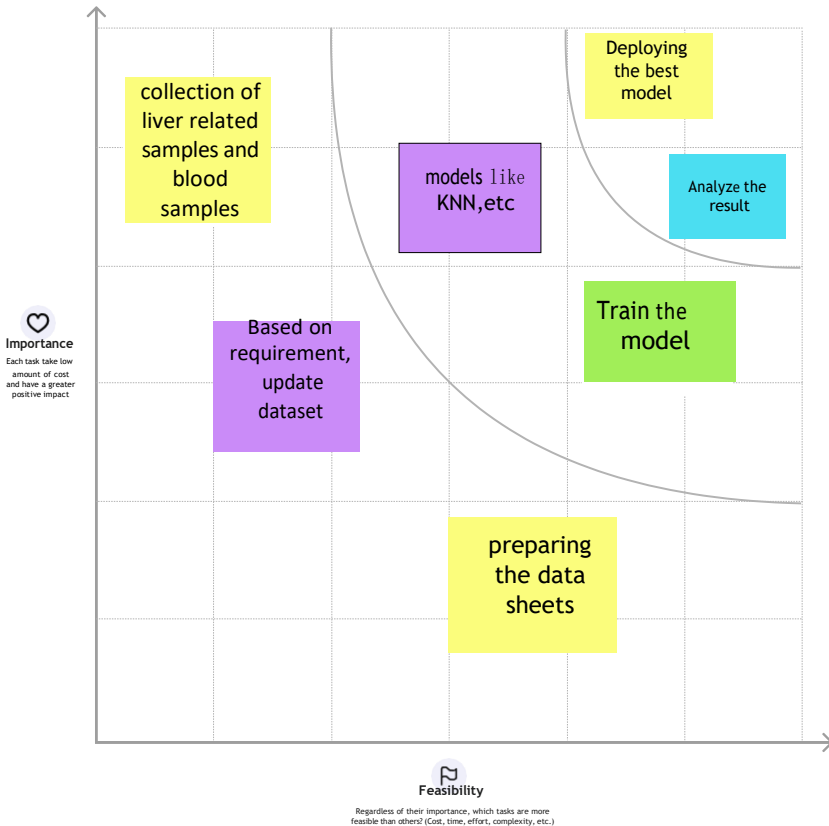

Deploying the best model

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint

Define the components of a new idea or strategy.
